

Draw a square like  
Ruby Red,

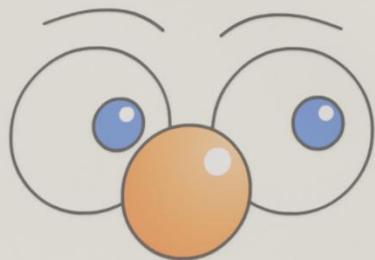

keep the lines straight or  
they'll be wonky instead.

Follow the arrows to complete  
the square,

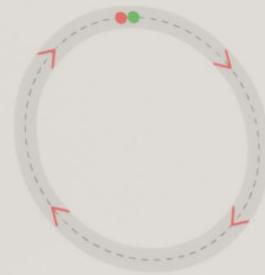

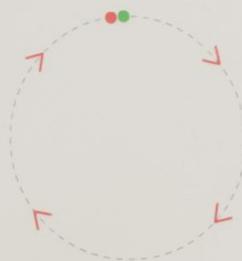

draw some fun glasses like  
Freddie the bear.

Sketch draws circles,  
nice and round,

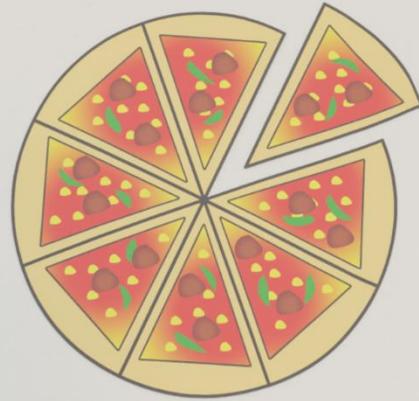

no straight edges here to  
be found.

There's lots of eyes that  
you can draw,

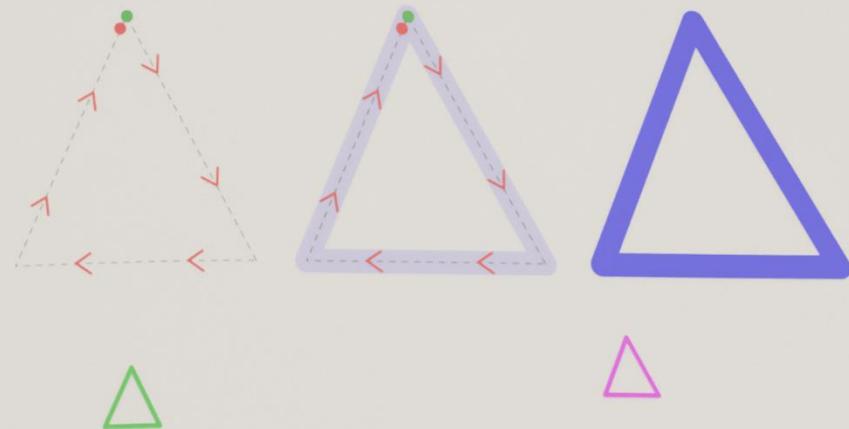

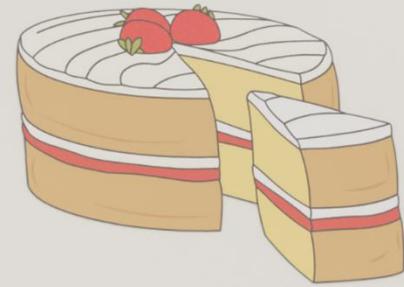

with big round noses and  
so much more.

△  
Drawing angles is such  
great fun,

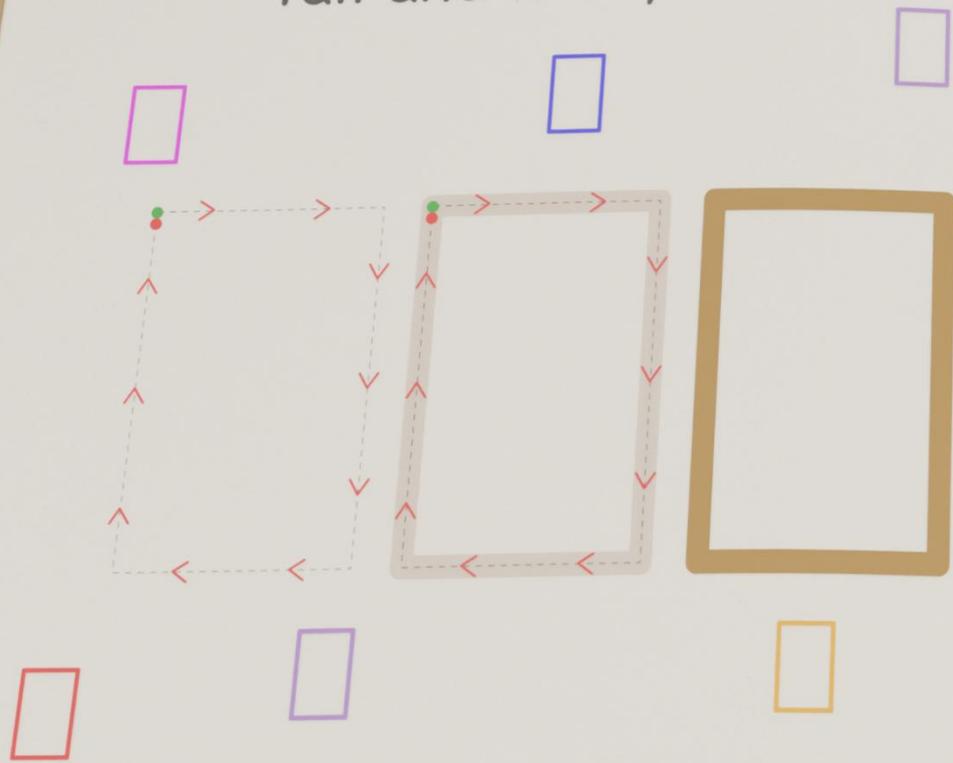

△  
three points of a triangle  
can be done. △

△  
Our friend Zippy loves pizza  
and cake,

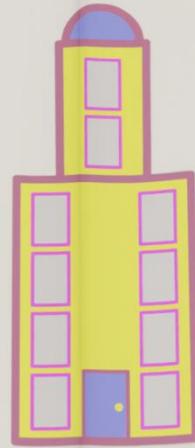

△  
ice cream cones you too can  
make. △

Rulie likes rectangles,  
tall and wide,

and very high buildings with  
buses to ride.

Windows and doors are  
easy to do,

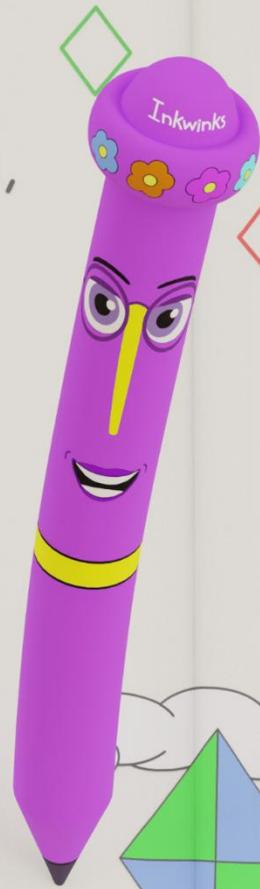

but very tall ladders maybe  
tricky for you.

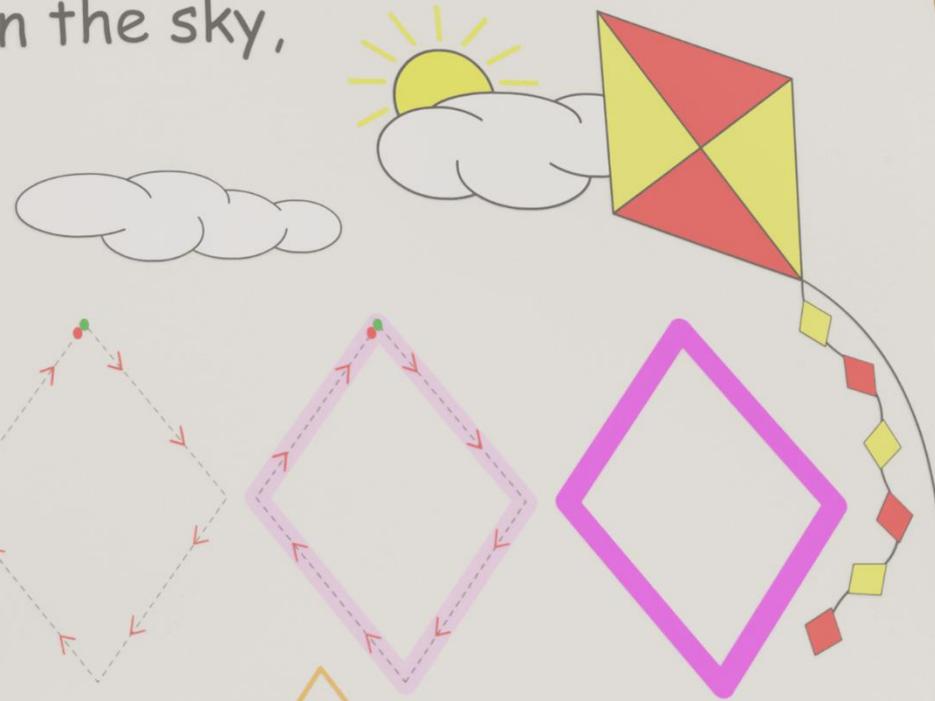

Diamonds are pretty  
when drawn in a chain,

but are Pennie's necklaces  
coloured the same?

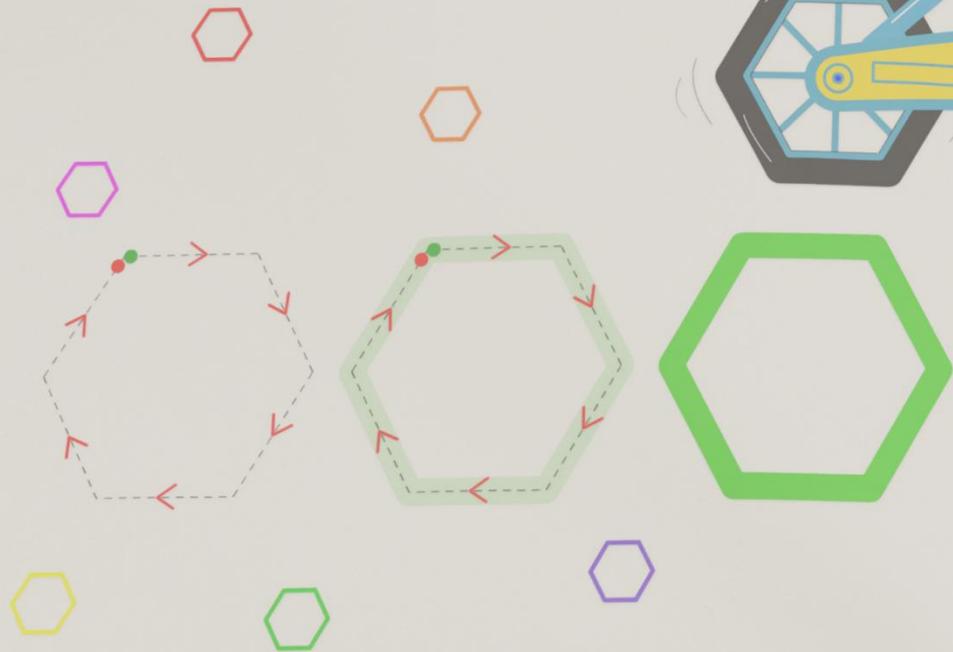

Now draw some kites high  
in the sky,

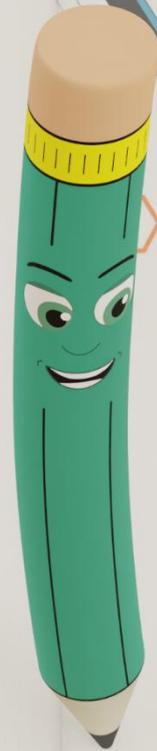

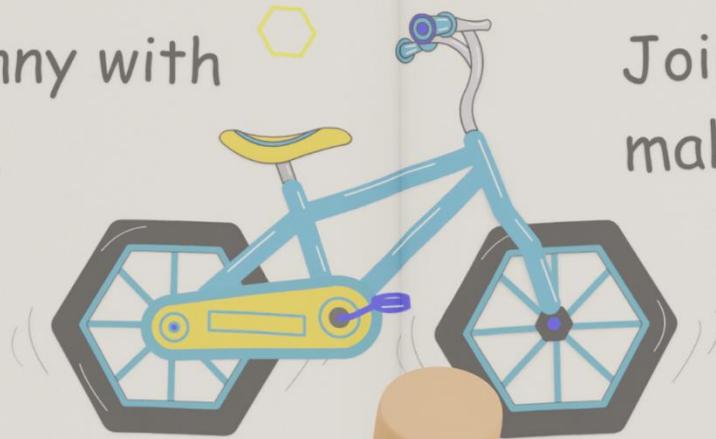

with diamond shaped tails  
as clouds float by.

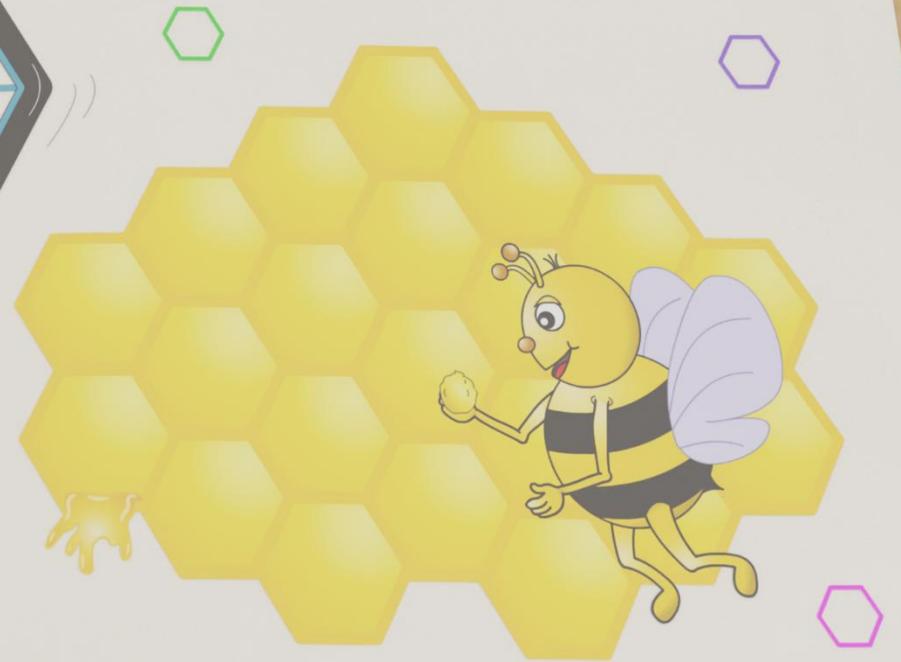

Hexagons look funny with  
six straight sides,

and make Sketch's bike  
very hard to ride.

Join them together and  
make honeycomb,

guess what insect makes  
honey at home.

Stars are sparkly and  
shine so bright,

paint one like Punkie, but will  
it be right?

Great if you can, you  
are so clever,

now fill the page so they  
go on forever.
