My Marvellous Missing Half!

One imaginative adventure. Three flexible levels.

RECEPTION

Finish the Picture!

Draw half of a picture with two matching sides, just like Little Sketch. Maybe half a butterfly, a flower or a happy face? You decide!
Then draw the other half to complete the picture. Now try another picture, but this time make the two sides different. See what funny creations you can imagine!

Teacher guidance: Some children may find drawing a vertical dotted line down the middle of their picture first very helpful.

EYFS · Mathematics — matching and spatial awareness; Expressive Arts and Design — imaginative drawing.

YEAR 1

A Different Kind of Picture!

Draw a picture with two matching sides. Now create another version of your picture, but with two very different sides.
Perhaps a butterfly with a dragon’s wing or a face that is half human and half robot? Use your imagination to make it as unusual as you like.
Give your new creation a name and write a sentence describing it.

KS1 · Art and Design — imaginative design; English — sentence composition; spatial awareness.

YEAR 2

Wonderfully Different!

Create an imaginative picture with two deliberately different halves. Perhaps an animal, a magical plant or an extraordinary invention?
Give your creation a name and write a short description explaining how the two sides are different and why you designed them that way.

KS1 · Mathematics — line symmetry; Art and Design — creative decisions; English — descriptive writing.
